Report completed, auditor happy, will be on website next week.

As at 20<sup>th</sup> Dec

Report will be approved at next general meeting

## **PRESIDENTS REPORT:**

As Read. Moved Ted Howard, Sec Bill Hartley - Carried.

## **GENERAL BUSINESS:**

1. Neil – job as club captain is job to keep facilities operational, at the moment they are not.

Current estimates of costs are around \$100K. We will get more quotes and apply for grants, but the committee needs authority to make loans and set levies to repay those loans.

Moved – that the committee has authority to raise loans and set levies for repayment if required. – Rejected and agreed to come back to a special general meeting before any money borrowed.

Would like some people to act as guarantors for the club.

Agreed that borrowing money is the last thing we will do, and asking for grants will be the first.

Could consider calling a special general meeting to consider any loans.

Dodd suggested the possibility of precast panels.

Al Lean – Possibility of forward payment of membership fees.

Possibility of debentures.

Discussion of a Givealittle page (Dodd)

Synthetic Reinforcing allows depths down to 100mm

Agreed priorities South Bay, Pier, then Oaro.

Meeting feeling to spend as little as we can.

**Special general meeting for Easter.**

Dodd – It is now, and for the next 10 months a public ramp.

Neil – 7 days to do poles and concrete with the current plan.

Agreed to get Kevin to do some tidy up work at the Pier on the next low tide.

Graeme asked Has anyone got a friendly contractor with an old potato apron? It would provide a quick fix in the short term – stabilising the bottom.

2. Rule change – 14(e) – Moved Ted, Seconded Bill - 3 against rest for.
3. Rule change – 20(f) - Moved Ted, Seconded Richard – Passed.
4. Life membership – Wayne Anderson – Moved Bill Hartley, Sec Ted Howard - carried  
Ted Howard - Moved Bill Hartley, Sec Dave Milne - passed by unanimous show of hands in both cases.
5. Damon Macphail – Grandad had one of the 2 boatsheds where the council ramp was.  
Had concerns about more cars and traffic in front of his property.  
Is concerned about the emergency legislation and the history of the public slipway. Aware of a considerable amount of pressure on the public slipway who find the recreational users annoying and dangerous. The safety card is hard to argue against. A bit cynical, and don't necessarily trust commitments. Have made the ramp deeper and wider. An attempt to purchase the slip about 25 years ago by council was turned down. Suspect that there is a possibility that the government will acquire the ramp at market value.  
How do we protect ourselves?  
Propose that we make it less attractive for a government takeover.  
Motion – That club maintains the slipway amenities but does not unwittingly allow development as a public facility. Failed from lack of a seconder.  
Agreement that we did not want this to happen, and that it will not happen if this committee has any say in the matter.
